Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Pursuant to a preliminary amendment filed 11/20/06, claim 12 has been amended. Claims 1-25 remain pending.

Applicants' election of "polymer 1" is acknowledged. Applicants' stated species election is interpreted to mean that the elected specie is obtained by conjugating *alpha*-tocopherol to *alpha*-L- polyglutamate which has a molecular weight of 10000 so as to produce a degree of grafting of about 7.8%

Claims 15-25 are withdrawn pursuant to the restriction.

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it in such full, clear, concise and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2 is rejected under 35 U.S.C. §112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The amendment to claim 2 changes the definitions of R^1 and R^2 . However, descriptive support for these changes is lacking.

Claims 8-14 are objected to under 37 CFR 1.75(c) as being in improper form because multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP 608.01(n).

Claim 2 is rejected under 35 U.S.C. §112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claim 2 recites a Markush group for variable R^3 , and uses the term “comprises”. This term, however, fails to set the metes and bounds of the claim.
- Claim 2 recites that the organic cation can be a cation which based on polyamine. Also recited, in parentheses is that polyethyleneimine is particularly preferred. This phrase (“polyethyleneimine being particularly preferred”) should be removed from claim 2 and moved to a dependent claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this action.

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. §102(e) as being anticipated by Lambert (USP 7,030,155).

Lambert discloses (col 8, line 29+) discloses a conjugate that comprises alpha-tocopherol bonded to polyglutamate.

Thus, the claim is anticipated.

The two documents which have been stricken from the IDS were so treated because of the absence of a translation.
